From the INTERNATIONAL SEARCHING AUTHORITY	PCT		
To: BAXTER HEALTHCARE CORPORATION Attn. Guthrie, Janice P.O. Box 15210 Irvine, CA 92623-5210 UNITED STATES OF AMERICA  By	NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL SEARCH REPORT AND THE WHITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY, OR THE DECLARATION 2 7 2004 (PCT Rule 44.1)		
	Date of mailing (day/month/year) 09/12/2004		
Applicant's or agent's file reference  NV-1939	FOR FURTHER ACTION See paragraphs 1 and 4 below		
International application No. PCT/US2004/020048	International filing date (day/month/year) 23/06/2004		
BAXTER INTERNATIONAL INC.			
1.  The applicant is hereby notified that the international search report and the written opinion of the International Searching Authority have been established and are transmitted herewith.  Filling of amendments and satement under Article 19:  The applicant is entitled, if he so wishes, to amend the claims of the International Application (see Rule 46):  When? The time limit for filling such amendments is normally 2 months from the date of transmittal of the International Search Report, however, for more details, see the notes on the accompanying sheet.  Where? Directly to the International Bureau of WiPO, 34 chemin des Colombettes  1211 Geneva 20, Switzerland, Fascimlie Nov. (41–22) 740.14.35  For more detailed Instructions, see the notes on the accompanying sheet.  The applicant is hereby notified that no International search report will be established and that the declaration under Article 17(2)(a) to that effect and the written opinion of the International Searching Authority are transmitted herewith.  With regard to the protest against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that:  the protest together with the decision thereon has been transmitted to the International Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices.  no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made.  4. Reminders  Shortly after the expiration of 18 months from the priority date, the international application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority claim, must reach the international Bureau as provided in Rules 90bis.1 and 90bis.3, respectively, before the completion of the technical preparations for international publication.  The applicant may submit comments on an informal basis on the written opinion of the Interna

## NOTES TO FORM PCT/ISA/220

These Notes are intended to give the basic instructions concerning the filing of amendments under article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the PCT Applicant's Guide, a publication of WIPO.

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions respectively.

## **INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19**

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the International preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international publication. Furthermore, it should be emphasized that provisional protection is available in some States only.

## What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

#### When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

### Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been its filed, see below.

#### How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

### What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

## NOTES TO FORM PCT/ISA/220 (continued)

The letter must indicate the differences between the claims as filed and the claims as amended. It must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new:
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

## The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

- [Where originally there were 48 claims and after amendment of some claims there are 51]:
   "Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers; claims 30, 33 and 36 unchanged; new claims 49 to 51 added."
- [Where originally there were 15 claims and after amendment of all claims there are 11]:
   "Claims 1 to 15 replaced by amended claims 1 to 11."
- [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims):
   "Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or
   "Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
- 4. [Where various kinds of amendments are made]: "Claims 1-10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

## "Statement under article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

It must be in the language in which the international appplication is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

## Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the same time of filing the amendments with the International Bureau, also file a copy of such amendments with the International Preliminary Examining Authority (see Rule 62.2(a), first sentence).

## Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, where upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see Volume II of the PCT Applicant's Guide.

Box No. I

Basis of the opinion

図 Box No. II

**Priority** 

☑ Box No. III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

☐ Box No. IV

☑ Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

☐ Box No. VI

Certain documents cited

☐ Box No. VII

Certain defects in the international application

☐ Box No. VIII Certain observations on the international application

#### **FURTHER ACTION** 2

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notifed the International Bureau under Rule 66.1 bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date. whichever expires later.

For further options, see Form PCT/ISA/220.

For further details, see notes to Form PCT/ISA/220.

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/US2004/020048

## Re Item II Priority

No check has been made as to whether the priority of the application is valid. In the case of the priority not being allowable, documents **D6** and **D7** would constitute prior art within the meaning of Rule 64.1(a) to be considered for Articles 33(2) and 33(3) PCT:

Document **D6** discloses (the references in parentheses applying to this document), a meningococcal conjugate combination which includes serogroups C, Y and W-135: Optimization of the MenCYW formulation was centred on the choice of the carrier protein (tetanus toxoid (TT)) for each serogroup polysaccharide, the O-acetylation status (fully de-O-acetylated for optimal antibody potency) and the size of the polysaccharides prior to their coupling to the carrier protein (abstract).

Document **D7** discloses (the references in parentheses applying to this document), the preparation of Tetanus toxoid (TT) conjugates of dOA (de-O-acetylated) and OA GYMP. The antibodies induced with the dOA GYMP conjugates were able to kill both OA and dOA GYM strains. Further, inhibition of SBA with PS showed dOA GYMP to be significantly more effective than its OA counterpart at inhibiting the SBA of OA bacteria, making the dOA form of the GYMP a better candidate than the OA for vaccine development (abstract).

## Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The method as claimed in **claim 23** relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT (method of treatment (cf. "administering") carried out on the living human or animal body). Consequently, no opinion will be formulated on the industrial applicability of the subject-matter of this claim (Article 34(4)(a)(i) PCT, see also the PCT-guidelines IV-2.4.(d) and IV-2.5); an opinion on novelty and inventive step will be given for the alleged effects of a vaccine of claim 11 in the method of claim 23.

## Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## 1. Novelty:

1.1 Document **D1** discloses (the references in parentheses applying to this document), acid methanolysis of the serogroup Y meningococcal polysaccharide of *N meningitidis* (Abstract, page 2, right-hand column, § 4), and the de-O-acetylation of said serogroup Y polysaccharide using 0.1 M NaOH (page 2, left-hand column, § 2). This document discloses as well re-N-acetylation of said polysaccharides (page 2, right-hand column, § 4 and 5)

Thus D1 anticipates the subject-matter of claims 24-26 of the application.

- 1.2 Document D2 discloses (the references in parentheses applying to this document), the base-catalysed (using 200 mM NaOH or NaOD) de-O-acetylation of the Group Y capsular polysaccharides from N. meningitidis (Abstract, page 1237, § 3.2; Fig 3; page 1242, § 3.6 and 3.7).
  - Thus **D2** anticipates the subject-matter of claim 25 of the application.
- 1.3 Therefore, the subject-matter of **claims 24-26** can**not** be considered **new** (Article 33(2) PCT).
- 1.4 The subject-matter of **claims 1-23, 27 and 28** is not anticipated by the available prior art documents, it can therefore be considered **new** (Article 33(2) PCT).

## 2. Inventive step:

- 2.1 The subject-matter of claims 24-26 is not new (see above), it can therefore **not** be considered as involving an **inventive** step (Article 33(3) PCT).
- 2.2 Document **D3** is regarded as being the closest prior art to the subject-matter of independent claims 1, 6, 11, 18-23, 27 and 28, and discloses (the references in parentheses applying to this document), a polysaccharide-protein conjugate comprising an N-propionated polysaccharide (derived from a Meningococcus group selected from the group consisting of group Y, group C, group W135, and combinations there-

of: Claim 6) directly conjugated to a protein (tetanus toxoid, diphtheria toxoid e.g.: Claim 8) at the B-position of the propionate moiety (Claim 1); a vaccine comprising it (Claim 37); and a method of immunizing a mammal comprising administering said vaccine (Claim 41). The polysaccharide is de-N-acetylated by base hydrolysis (Claims 30, 31; page 6, lines 29-33; page 7, line 24 to page 8, line 10), using e.g. 2N NaOH (page 17, line 27; page 19, line 16), and re-N-acylated (page 8, line 24 to page 9, line 7). The vaccine can comprise an adjuvant such as aluminum hydroxide (page 13, lines 15-18), and is adapted for administration by injection (page 13, l. 15; page 25, l. 21).

- 2.2.1 The subject-matter of claims 1, 6, 11, 18-23, 27 and 28 therefore **differs** from this known conjugate/vaccine/use/process in that the group Y meningococcal polysaccharide is de-O-acetylated.
- 2.2.2 The **problem** to be solved by the present invention may therefore be regarded as to provide an alternative immunogenic conjugate for use against *N. meningitidis* infection.
- 2.2.3 The **solution** proposed in claims 1, 6, 11, 18-23, 27 and 28 of the present application cannot be considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

Document **D4** discloses (the references in parentheses applying to this document), an immunogenic conjugate of *N. meningitidis* group C polysaccharide coupled to the Tetanus toxoid protein carrier, and its use as vaccine. This document teaches that if the polysaccharide is de-O-acetylated, the quality of the immune response shifts such that superior levels of bactericidal antibodies are obtained when the vaccine is tested in mice.

Document **D5** discloses (the references in parentheses applying to this document), an immunogenic conjugate comprising a (fragmented) de-O-acetylated group C meningococcal polysaccharide in which at least 80% of the 7- and 8-groups of the sialic residues are hydroxyl groups or a fragment thereof, covalently coupled to a suitable carrier material or molecule (tetanus toxoid, pertussis toxin e.g.) (Claims 1-10, 16), and a vaccine comprising said conjugate (claim 19). Document **D5** discloses as well a method of immunizing mammals against *N. meningitides* infection, comprising the step of administering to said mammals a therapeutically effective amount of said vaccine (Claim 23). The de-acetylation is carried out under mild basic conditions, such as 0.01 to 0.5 N NaOH

(Claim 11; page 5, lines 27-31).

Thus, by reading **D4** or **D5**, the skilled person would de-O-acetylate the conjugated polysaccharide Y disclosed in **D3** and thus make a slight constructional change in the conjugated polysaccharide of **D3** which comes within the scope of the customary practice followed by persons skilled in the art, especially as the advantages thus achieved can readily be foreseen in **D4** and **D5**.

Consequently, the subject-matter of independent claims 1, 6, 11, 18-23, 27 and 28 lacks an inventive step (Article 33(3) PCT.

- 2.2.4 For the same reasons, the dependent claims 2-5, 7-10 and 12-17 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of inventive step.
- 2.2.5 **Moreover**, the basic conditions used in the process of document **D3** (2N NaOH: see above) for N-de-acetylation of the capsular polysaccharides from *N. meningitidis*, are much stronger basic conditions than the basic conditions which were used in the process of **D1** or **D2** (0.1-0.2 M NaOH: see above) to remove the O-acetyl groups from the Group Y capsular polysaccharides from *N. meningitidis*, which conditions did not remove the N-acetyl groups from said Group Y capsular polysaccharides.

Thus, although not specifically disclosed in **D3**, the basic conditions employed according to **D3** will remove the O-acetyl groups at the same time as the N-acetyl groups from the Group Y capsular polysaccharides from *N. meningitidis*, and make a conjugate according to claim 1 or 6 of the application.

Therefore, by employing the conditions suggested in the document **D3**, the skilled person would make a conjugate/vaccine according to the application, without the exercise of inventive skill, and the subject-matter of claims 1-28 cannot be considered as involving an inventive step.

2.3 Therefore, the subject-matter of claims 1-28 cannot be considered as involving an inventive step (Article 33(3) PCT).

## 3. Industrial applicability:

The immunogenic conjugate according to claim 1 or 6 is used in the manufacture of a vaccine (Claims 6 and 18-22).

Thus, the subject-matter of claims 1-22 and 24-28 complies with the requirements of Article 33(4) PCT.

## 4. Certain observations on the international application

- 4.1 All the features of claims 1-5, 10, 14, 15, 17, 23-25, 27 and 28 are not referred to in the description. Claims 1-5, 10, 14, 15, 17, 23-25, 27 and 28 are therefore not supported by the description as required by Article 6 PCT.
- 4.2 The expressions "polymeric carrier" and "carrier protein" used in claims 1 and 6 are vague and unclear and leave the reader in doubt as to the meaning of the technical features to which they refer, thereby rendering the definition of the subject-matter of said claims unclear, Article 6 PCT (The description (page 10, lines 1-18) limits and clarifies the meaning of said expressions).
- 4.3 Attention is drawn to the following: The use of the expression "incorporated by reference" (page 8, line 21; page 12, line 7) is not allowed in some designated Contracting States.
- 4.4 There are obvious spelling mistakes in the application:

Claim 5: "wherin" for "wherein";

Claims 7, 11, 19, 21 and 27: "claim 4" for "claim 6";

Claim 8: "claim 5" for "claim 7";
